SLATWALL SPINNING GONDOLA

Instruction Manual

Brief Introduction

Slatwall Spinning Gondola by Dinya Designs Shopfittings for professional retail merchandising. It features slatwall panels with aluminium inserts, offering a practical and space-saving display solution for retail environments.

Its four-sided rotating structure provides easy access to merchandise from every angle, while the slatwall system supports compatible hooks, shelving and acrylic accessories for displaying a wide range of retail products.

Product Appearance

Highlight

- Durable retail construction
- 360° rotating display
- Space-saving floor display
- Modern and sleek design
- Clean, modern & minimalist design
- Four-sided merchandising
- Flexible layout for different product
- Compatible with slatwall fittings

Application Scope

Suitable for various sectors including department stores, supermarkets, convenience stores, electronics, fashion accessories, sporting goods, and specialty retail.

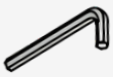

Assembly Instructions

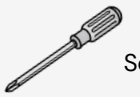

PRE-ASSEMBLY INSTRUCTIONS:

Read all instructions carefully before assembly. Check that all components and tools are available. Assemble on a clean, flat, and stable surface, following each step in order. Once assembled, ensure all parts are securely fitted and the spinning gondola rotates smoothly.

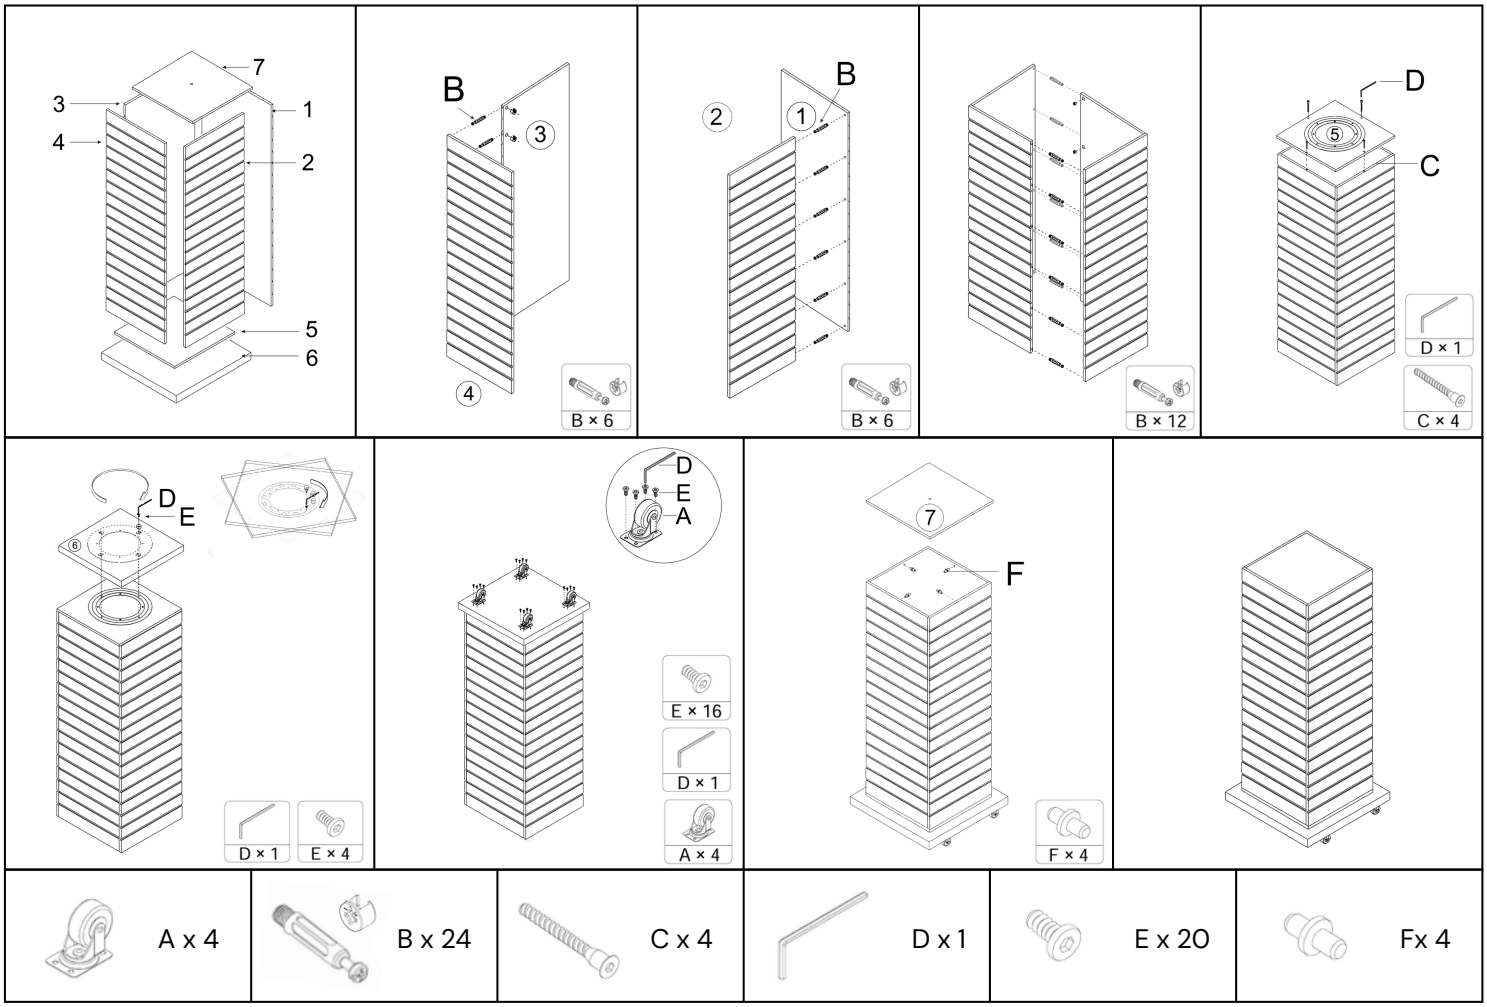

TOOLS REQUIRED

M8 Allen key

Screw Driver

Gondola Assembling Guidelines

- Read all instructions carefully and ensure the assembly area is clean and stable.
- Check all slatwall panels, base, bearing plate, castors, fittings, and hardware.
- Prepare the Allen key and arrange all components according to the assembly diagram.
- Join the slatwall panels in two pairs (3+4 and 1+2) using 6 connectors (B) for each pair.
- Join the two halves together using 12 connectors (B) to form the four-sided gondola structure.
- Check that all panel connections are tight and the structure is properly aligned.
- With the gondola turned upside down, attach the rotating bearing plate using the 4 long bolts (C).
- Place the square base over the bearing plate and fit the retaining ring.
- Secure the base to the rotating mechanism using 4 screws (E).
- Attach the 4 castors to the base using 16 screws (E) and ensure all four are securely fitted.
- Turn the gondola upright, insert the 4 pegs (F) into the base holes, and rest the top cover on them.
- Check all connections and confirm the gondola rotates smoothly and remains stable.
