

GLASS DISPLAY SHOWCASE CABINET

Instruction Manual

Clear Visibility
For Full Product Viewing

Secure Display
For Safe & Professional Presentation

Brief Introduction

Metal storage drawer by Dinya Shopfittings to provide a practical and durable storage solution for retail and commercial environments. Its sturdy panel construction and mobile caster-wheel base allow the drawer to be positioned and accessed with ease. Available in black and white finishes, the clean and minimal design integrates neatly with a variety of retail display settings while providing convenient additional storage.

Application Scope

Suitable for a variety of retail and commercial environments requiring secure, organised, and highly visible product presentation. Ideal for displaying electronics, mobile accessories, collectibles and other premium products in stores

Assembly Instructions

PRE-ASSEMBLY INSTRUCTIONS:

To prevent potential injury, component damage, or incorrect installation, it is imperative that you carefully read through the following step-by-step guidelines prior to starting the assembly. Assemble the product on a clean, flat, and stable surface with sufficient working space. Align components correctly before tightening, and avoid overtightening fixings. Please ensure all listed parts and tools are present before beginning.

TOOLS REQUIRED

Spanner

Screw Driver

Assembling Guidelines

- Place the front glass panel carefully on a safe, flat working surface.
- Slide both glass side panels into the aluminium tracks and keep all panel edges properly aligned.
- Insert the glass door panel into the side panel tracks and slide it carefully into position.
- Tighten the four screws located at the end of each aluminium track.
- Leave approximately 150 mm of clearance before fully sliding the door frame into position.
- Insert the base/bottom panel into the corresponding slot while the frame is still partially open.
- Continue sliding both the base and the doors carefully until the bottom panel and all glass panels are fully aligned.
- Position the upper panels correctly on top of the assembled glass cabinet frame.
- Connect and position the LED lighting component as shown in the assembly drawing.
- Fit the internal glass shelves into their designated support positions.
- Check that all glass panels, tracks, shelves, screws, and fittings are correctly aligned and secure.
- Place the cabinet upright and confirm it is stable and fully assembled before loading products.
